NOTIFICATION OF ELECTION

(PCT Rule 61.2)

Commissioner
US Department of Commerce
United States Patent and Trademark
Office, PCT
2011 South Clark Place Room
CP2/5C24
Arlington, VA 22202

Date of mailing (day/month/year)
16 August 2001 (16.08.01)

International application No.
PCT/US99/24649

International filing date (day/month/year)
20 October 1999 (20.10.99)

Applicant

COOK, Andre, Georges et al

1.	The designated Office is hereby notified of its election made:
	X in the demand filed with the International Preliminary Examining Authority on:
	30 April 2001 (30.04.01)
	in a notice effecting later election filed with the International Bureau on:
2.	The election X was
	was not
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland

Section V.2:

Claims 1 to 3

Document FR-A-1467 950 discloses a flexible hose comprising a flexible material, the flexible material comprising a reinforcing rod positioned externally of the flexible material, the flexible material being formed with terminal ends and the reinforcing rod having a terminal end being located short of the terminal ends of the flexible material. It is clear from the description (it says that the spiral can be attached within or outside the hose) and figures (they show that the spiral is located short of the ends of the flexible material) that no spiral reinforcement at the terminal ends of the hose is provided. With this construction the flexible material becomes a soft cuff adapted to be received by a hose fitting.

The hose according to claim 1 differs therefrom in the sense that the flexible material comprises multiple layers and that the reinforcing rod is bonded to the outermost layer of the flexible material.

Taking into consideration that the essence of the invention is to be seen in the fact that a non-reinforced end of the flexible material forms a soft cuff adapted to be received by a hose fitting (as shown by FR-A-1467 950), it is obvious for the man skilled in the art to additionally provide the hose with multiple layers and to bond the reinforcing rod to the outermost layer because the problem of forming a soft cuff at the terminal ends of the hose is clearly solved.

The present application does not meet the requirements of Article 33(3), because the solution proposed in claim 1 cannot be considered as involving an inventive step.

Dependent claims 2 and 3 do not contain any features which, in combination with the features of claim 1, meet the requirements of the PCT in respect of inventive step.

Claims 4 to 8

Page 4 of the description (see also US-A-4856 720) describes as prior art a method of manufacturing a hose comprising

rotating a mandrel, feeding a length of material onto a mandrel as it rotates and feeding a second length of material in form of a reinforcing rod onto the mandrel as it rotates and curing the hose length.

The method according to claim 4 differs therefrom by

prior to feeding the reinforcing rod onto the material modifying the hose length to create non-adhesive regions thus prohibiting the second length of material from curing to the reinforcing rod.

The cuffs which are adapted to be received by a hose fitting may be at the edges of these pro-selected region.

Such a possibility is not foreseen in prior art documents so that the application meets the requirements of Article 33(3) PCT52(1) EPC.

Dependent claims 5 to 8 contain special embodiments of the subject-matter of claim 1 and fulfil as dependent claims likewise the requirement of Article 33(3) PCT.

Note: In respect of clarity (see Article 6 PCT) claim 4 should contain at its end the feature "thus prohibiting the second length of material from curing to the reinforcing rod". Only in combination with this feature the non-abrasive regions make a sense because the hose must not be cured at said portion.

Claims 9 to 13

Claim 9 concerns a hose length formed during the formation of a hose, comprising an elastomeric layer and a reinforcing rod helically wound externally of the elastomeric layer, the layer being cured to the reinforcing rod. Such a hose is generally known, as described on page 4 and in US-A-4856 720.

The device according to claim 9 differs therefrom by non-adhesive regions formed externally of the outermost layer periodically spaced along the hose length thus prohibiting the elastomeric layer from curing to the reinforcing rod.

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US99/24649

For the same reasons as mentioned above in respect of claim 4 also the subject-matter of claims 9 to 13 fulfils the requirement of Article 33(3) PCT.

Note: In respect of clarity (see Article 6 PCT) claim 9 should refer to a hose length "formed during the formation of a hose in accordance with claims 1 to 3" and contain at its end the feature "thus prohibiting the elastomeric layer from curing to the reinforcing rod". Only in combination with this feature the non-abrasive regions make a sense because the hose must not be cured at said portion.

10

15

25

30

8

CLAIMS

What is claimed is:

1. A flexible hose (10) comprising a flexible material (14), the flexible material (14) comprising multiple layers and a reinforcing rod (12) positioned externally of the outermost layer of the flexible material (14) and bonded to the outermost layer of the flexible material (14), the flexible material (14) being formed with terminal ends (18), the improvement being characterized by:

the reinforcing rod (12) having at least one terminal end (16) being located short of the terminal ends (18) of the flexible material (14), the flexible material (14) thus becoming a soft cuff (20) adapted to be received by a hose fitting.

- 2. A flexible hose (10) in accordance with claim 1, wherein the hose (10) is further characterized by an imprinted indent (50) extending through the soft cuff (20).
- 3. A flexible hose (10) in accordance with claim 2, wherein the reinforcing rod (12) is wound at a pitch externally of the flexible material (14) and the indent (50) is wound at a pitch greater than the pitch of the reinforcing rod (12).
- 20 4. A method of manufacturing a flexible hose (10) comprising
 - a) rotating a mandrel (30)
 - b) feeding a length of material (42) onto the mandrel (30) as the mandrel (30) rotates, to build a hose length (32) on the mandrel (30),
 - c) feeding a second length of material in the form of a reinforcing rod (12) onto the mandrel (30) as the mandrel (30) rotates to form a helical reinforcing rod (12) on the hose length (32), and
 - d) curing the hose length (32),

the improvement being characterized by:

prior to feeding the reinforcing rod (12) onto the mandrel (30), modifying the hose length (32) to create non-adhesive regions (46).

5. A method of manufacturing a hose (10) in accordance with claim 4, the method being further characterized by applying a third material (44) to the hose length (32) to create the non-adhesive regions (46).

15

25

- 6. A method of manufacturing a hose (10) in accordance with claim 4, the method being further characterized by cutting the hose length (32) in the non-adhesive regions (46).
- A method of manufacturing a hose (10) in accordance with claim 4, the method being further characterized by varying the speed at which the mandrel (30) rotates as the reinforcing rod (12) is feed onto the mandrel (30) at the non-adhesive regions (46).
- 8. A method of manufacturing a hose (10) in accordance with claim 4, the method being further characterized by reducing the winding tension of the reinforcing rod (12) as the reinforcing rod (12) is feed onto the mandrel (30) at the non-adhesive regions (46).
 - 9. A hose length (32) comprising at least one elastomeric layer (22 or 28) and a reinforcing rod (12) helically wound externally of the outermost elastomeric layer (28), the improvement being characterized by:

non-adhesive regions (46) formed externally of the outermost elastomeric layer periodically spaced along the hose length (32).

- 10. A hose length (32) in accordance with claim 9, the hose length (32) being further characterized by the reinforcing rod (12) not being adhered to the at least one elastomeric layer (22 or 28) in the non-adhesive regions (46).
 - 11. A hose length (32) in accordance with claim 9, the hose length (32) being further characterized by a rope (48) being wound adjacent to the reinforcing rod (12).
 - 12. A hose length (32) in accordance with claim 9, the hose length being further characterized by the reinforcing rod (12) being wound at a greater pitch length in non-adhesive regions (46).
- 30 13. A hose length (32) in accordance with claim 9, the hose length being further characterized by the reinforcing rod (12) being wound at a lesser winding tension in the non-adhesive regions (46).

GOODYEAR PATENT & TRADEMARK DEPT.

Form PCT/ISA/220 (July 1998)

JUN 20 2000

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international politication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
 "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]:
 "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
 "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

Date of mailing

(day/month/year)

14.02.2002

Applicant's or agent's file reference

DN1999227PCT

IMPORTANT NOTIFICATION

International application No. PCT/US99/24649

International filing date (day/month/year) 20/10/1999

Priority date (day/month/year)

20/10/1999

Applicant

THE GOODYEAR TIRE & RUBBER COMPANY et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.
